PIRANHA™

3A

**The most aggressive
saw blade ever made for so many
applications .**

Piranha™ is the most aggressive circular saw blade ever made for use on hand-held hi-speed cutoff gasoline demolition-type saws for cutting the materials listed herein.

Engineered to cut a variety of those difficult to cut materials, that very often frustrate Fire Departments and Emergency Resue Squads.

WARNING
Piranha blades are not intended for use on masonry, concrete or stone. Use Diamondsharp stone blades.

Piranha™ cuts through . . .

- Insulation and materials
- Tar and gravel
- Shingle roofs
- Auto body panels
- Fire doors
- Tires
- Sheet metal, tin
- Sheet aluminum
- Ice, frozen materials
- Wood-metal studding
- Dry wall
- Railroad ties
- Expansion joint sealer
- Hardwood flooring
- Counter tops
- Timber
- Cardboards
- Pallets
- Tree roots
- Corrugated roofing
- Plastic
- reinforced rubber
- Chip board
- Hard board
- Decking

NO SHARPENING REQUIRED -- CUTS IN ANY DIRECTION
Segments are fusion-formed of coarse tungsten carbide particles. When sawing, dust and material particles will be common as the **Piranha** is very aggressive. Wear protective clothing and gear.

Made to fit Stihl, Ryobi, Makita, Husqvarna, Partner and other demolition saw brands. Bore size is 1-inch or 20 mm.

Piranha™ blades will find many uses with:

- **Demolition Crews**
- **Wreckers/Recyclers**
- **Renovators**
- **The Do-It-Yourselfer**
- **Rescue Units**
- **Farmers**
- **Landscapers**
- **Contractors**
- **Roofers**
